Expires 5pm AEST 14 July 2017
From 5pm AEST 14 July 2017
After 5pm AEST 21 August 2017

In accordance with our business conditions,

-notify CLEMS of any errors IMMEDIATELY

• 3 business days – if not, contact CLEMS

• AFTER forwarding registration check ASAP:

• • •

• BEFORE forwarding registration check:

- Applications will be processed according to advertised conditions
- Submitting application is an acceptance of Terms and Conditions

IMPORTANT INFORMATION

- Submitting application is an acceptance of Terms and Conditions
- Applications will be processed according to advertised conditions

BEFORE forwarding registration check:

- your correct city to attend is selected
- your name and contact details are clearly printed
- selection of payment for eligible registration category
- your name and phone / mobile is correct
- provide electronic OR mail registrations – avoid DUPLICATE confusion

AFTER forwarding registration check ASAP:

- email confirmation letter / fax receipt with ten digit details is received in
  3 business days – if not, contact CLEMS
- emailed receipt lists correct city and spelling of your name and address
- notify CLEMS of any errors IMMEDIATELY

Who Is This Training For?

This Intensive 2-day PD training provide the opportunity for detailed exploration and effective interventions with:

- Child abuse and neglect
- Dysfunctional families
- PTSD and complex trauma
- Dissociative disorders
- Individuals struggling with interpersonal relationships and fulfillment
- Depression and other mood disorders
- Anxiety disorders
- Personality disorders
- Schizophrenia and psychosis
- Eating and somatiform disorders
- Substance abuse and additions

Delphi Training and Consulting
Continuing Education Scholarship Fund

Funds are contributed from registration fees to provide
6 registration scholarships for health professionals / students meeting certain criteria for genuine financial hardship and isolation:

- Visit www.delphicentre.com.au
- Applications close 1 June 2017

Depression and other mood disorders
PTSD and complex trauma
Dissociative disorders
Individuals struggling with interpersonal relationships and fulfillment
Eating and somatiform disorders
Substance abuse and additions
Damage and the impact of trauma to the right person.

Effective interventions with:

Susan Hart is a psychologist and has expertise in supervision in child psychology and in psychotherapy. Her professional background is in family treatment, child psychiatry and parent-child assessments, and she is now in private practice.

In her extensive international lecture and workshop activity, she develops and teaches the neuroaffective theory, which is based on recent brain research. Her organizing goal is to develop a system to bring the right intervention method to the right person.

She started to outline neuroaffective developmental theory about 20 years ago, by bridging neuroscience with developmental psychology, and her focus today is on translating the theory into practice. She has taught several workshops with Peter Levine in Europe about bridging attachment theory with the trauma treatment approach Somatic Experiencing.

She has authored and edited 14 books on neuroaffective developmental psychology and psychotherapy, as well as on trauma and dissociation in Danish, and 4 of her publications are translated into English: Brain, Attachment, Personality (Karnac), The Impact of Attachment (Norton), together with Psychotherapist Marianne Bentzen Through Windows of Opportunity - A Neuroaffective Approach to Child Psychotherapy (Karnac) and she has edited Inclusion, Play and Empathy – Neuroaffective Development in Children’s Groups (Jessica Kingsley Publishers).

**Additional Details**

**Email**

Dr. Susan Hart, Denmark, is a renowned trauma specialist, working with children adults and families. Dr. Susan will elucidate the theoretical underpinnings of the Neuropsychotherapy Compass Model and a coherent framework for its clinical applications to assist children, adults and families heal from trauma, emotional dysregulation and disrupted attachment. Susan presents complex dynamics with clarity and compassion, demonstrating a great depth of insight and wisdom in working with human suffering. Susan presents complex dynamics with clarity and compassion, demonstrating a great depth of insight and wisdom in working with human suffering.

**Overview of Program**

In this workshop Susan Hart will bridge the latest decades of research with attachment theory and developmental psychology, focusing on a core insight – that the brain interacts with the environment through experiences of being attuned with important others. The key to understanding and healing such diverse problems as stress, posttraumatic disorder and even disorganized attachment is that they are responses to massive misattunement processes.

Healthy personality development occurs in an interpersonal system that is co-regulated through attunement to synchronizing moments of interaction. This is the hallmark of the healthy parent-child dyad as well as the healthy psychotherapy relationship, where psychotrauma plays the primary responsibility for creating co-regulated synchrony with the client through the quality of their presence as well as their internal methods and interventions.

Through videoclips and experiential exercises Susan Hart will give a brief summary of clinical experiences with the Mentalization based intervention and the development of the neuropsychotherapy compass model, these three levels have a framework for insight into:

- healthy emotional development,
- the nature of dissociation,
- assessing the client level of personality and chronicity of attachment disorders.

and selecting the best interventions to help support traumatized children, families and adults out of traumatic and disorganized states.

**Learning Objectives**

Attendees will be able to:

1. Identify the Neuropsychotherapy Stages: Theory – Method – Self-agency.
2. Apply the knowledge of trauma and insufficiency attachment in arrested personality development in treatment of children, adults and families.
3. Discover resources and interventions on the different hierarchical levels of the brain.
4. Structure therapy according to the neuropsychotherapy compass model of personality development.
5. Connecting bottom-up and top-down strategies – from sensorimotor to interpersonal level of interaction. Organized in video clips and experiential exercises Susan Hart will give a brief summary of clinical experiences with the Mentalization based intervention and the development of the neuropsychotherapy compass model, these three levels have a framework for insight into:
6. healthy emotional development,
7. the nature of dissociation,
8. assessing the client level of personality and chronicity of attachment disorders.

and selecting the best interventions to help support traumatized children, families and adults out of traumatic and disorganized states.

**Learning Objectives**

Attendees will be able to:

1. Identify the Neuropsychotherapy Stages: Theory – Method – Self-agency.
2. Apply the knowledge of trauma and insufficiency attachment in arrested personality development in treatment of children, adults and families.
3. Discover resources and interventions on the different hierarchical levels of the brain.
4. Structure therapy according to the neuropsychotherapy compass model of personality development.
5. Connecting bottom-up and top-down strategies – from sensorimotor to interpersonal level of interaction.
6. Navigate a therapy session with the inquiry “What works for whom?”

**Program Outline – see website for full details**

**Day 1**

The relationship between windows of opportunity and the proximal zone of development

- From brain to nurture
- Temperament
- Self-regulatory capacity

Establishing macro- and micro regulation

- Structure, limits, rules and rituals
- Resilience and mirror neurons

The hierarchical brain

- Levels of development and learning
- Neurodevelopmental processes due to strain and psychological overload
- Synchronization processes in normal development
- Limbic level
- Prefrontal

Developmental arrest:

- Lack of development of neural networks and circuits
- Limbic level

Treatment goals for psychological imbalances

- Symptom reduction
- Emotional and personality development
- Integration of dissociated structures – trauma healing

**Day 2**

Mental development occurs at 3 levels:

- Synchronizing capacity
- Emotional and personality development
- Mentalizing dialogues

The Neuropsychological Compasses

An overview of:

- Autonomic level
- Limbic level

The automatic compass

- Self-protective strategies
- Synchronization processes in normal development
- Synchronization processes in therapy

The limbic compass

- Self-protective strategies
- Attachment processes in normal development
- Attunement processes in therapy

The prefrontal compass

- Prefrontal self-protective strategies
- Attunement processes in normal development
- Mentalizing processes in therapy

Working from “Bottom Up” and “Top-Down”

- From social engagement to mentalization
- Connecting all levels in the hierarchical brain
- Present moments in psychomotor
- Presentation of a demonstration video

**Registration Fees - Book early to ensure your place!**

- Full attendance (FULL TIME STUDENTS must meet criteria an APPLICATION ON WEBSITE for this special discount)

**Terms & Conditions**

- Forward payment in full with all details complete
- No refund or transfer of person places allocated on first come first served basis
- Late or onsite registration details required for venue and seminar material updates – please include your contact details and where you intend to register your details
- Confirmation will be provided in writing
- All dates subject to expiry at 5pm AEST for receipt or close of standard registrations
- Registration includes:
  - All dated / split registrations
  - Book early to ensure your place!
  - Your direct email and contact details required or individual fee will automatically apply
  - Generous credit will be provided where an email receipt/confirmation letter is NOT received within 3 business days
  - Payment received electronically or postmarked by receipt or close of standard registrations
  - Errors in details provided
  - No exceptions possible.

- Book early to ensure your place!

**Cancellation**

- A $110 admin fee will be required; PRIOR to Close of Standard registrations
- If notified after Close, no guarantee – please advise by email ASAP for transfer of registration
- All dates subject to expiry at 5pm AEST for receipt or close of standard registrations
- Late / Onsite registration
  - Must be made in writing before Close of Standard registration
  - Must Fulfill Criteria Below:
  - Self-funding FULL-TIME STUDENTS must meet criteria in APPLICATION ON WEBSITE for this special discount
  - Additional Discount – Group (5+ people) $595 $625 $655
